14. Commander's Analysis.

- a. This operation went a long way toward dispelling doubts as to cross-country travel capability of Ontos. Virtually all Ontos operating was done off the roads.
- b. Ontos fire appears to have been overcontrolled. Although suitable targets appeared, permission to fire was often denied. In some cases the target was fleeting, and had disappeared before other supporting arms could be brought to bear.

15. Recommendations.

- a. Increase the employment of Ontos units in a manner which exploits the inherent mobility and firepower of the Ontos.
- b. Give greater control in the employment of the Ontos to the local Ontos unit commander.
