PART II

NARRATIVE SUMMARY

1. Mission Assigned

a. The Third Tank Battalion mission is to provide combat support for the Third Marine Division in current operations utilizing mobility, armor-protection, fire power, and shock action to close with and destroy enemy forces, fortifications, and materials. The Third Tank Battalion (-) Reinforced is in general support of the Third Marine Division with a Tank Company in direct support operational control of the Third Marines, a Tank Company in direct support operational control of the Ninth Marines, a Tank Company attached to the Fourth Marines, and a Tank Company (-) attached to the Seventh Marines.

2. Chronological Summary of Events

1 August 1965 - Company "B" conducted two fire missions in support of 2d Battalion, 9th Marines sweep and clear operations in Cam Ne (1). Targets were defensive bunkers and trenches located at AT 987683 and AT 987687. Both targets were damaged and one bunker was destroyed.

2 August 1965 - Company "A" in direct support of 3d Marines operation "Blast Out I" in southwest portion of DaNang TAOR. Company conducted patrol and sweeping operations on western flank with elements of the 3d Reconnaissance Battalion. No enemy activity encountered.

3 August 1965 - Company "A" continued to provide tank support to 3d Marines operation "Blast Out I". Tanks were employed to clear village fortifications of booby-traps and anti-personnel mines. No enemy troop units were encountered. Company "B" conducted fire mission in support of 2d Battalion, 9th Marines sweep and clear operations in Cam Ne (1). One bunker where automatic weapons fire was coming from was destroyed (AT 979675). During the evening Company "B" displaced to the Marble Mountain area in preparation for operations with the 1st Battalion 9th Marines.

4 August 1965 - Company "A" returned to Command Post from Operation "Blast Out I" after having provided security for two damaged LVTE-1's during the night of 3-4 August. Company "B" conducted tank-infantry sweep and clear operations south and west of Marble Mountain. Three tanks were temporarily mired in rice fields but were back in action in less than an hour. There was no enemy contact with the tanks although an LVT was extensively damaged when it struck a mine while operating with the tanks.

5 August 1965 - Company "B" continued the tank-infantry search and destroy operations southwest of Marble Mountain. Tank fire was used to destroy enemy bunkers, emplacements and trench lines. Tanks received a considerable amount of small arms fire from a fortified building at (BT 037656) shortly after noon. The structure was destroyed and the enemy small arms fire ceased as a result of the tank fire.

Copy 1

**UNCLASSIFIED**

6 August 1965 - Company "A" was assigned a mission to crush and burn a suspected enemy District Headquarters at (AT 876692). Upon reaching their destination they found the area deserted. A Flame Tank was used to destroy suspected enemy emplacements and meeting places in the immediate vicinity. Company "B" concluded its support of the 1st Battalion, 9th Marines sweep southwest of Marble Mountain without further enemy contact.

7 August 1965 - Company "A" continued to support search and destroy operations of the 1st Battalion, 3d Marines near Cau Song (1) (AT 875695). Additional enemy emplacements were destroyed and the operation concluded during the early evening hours without enemy contact.

8 August 1965 - In response to a request from the 2d Battalion, 9th Marines tanks located at the Battalion Command Post conducted a fire mission against a known enemy ammunition storage area at (AT 987688). Eleven rounds were fired and the target was destroyed as well as the ammunition contained therein. The Battalion completed proficiency firing with all Command Post weapons. Medical personnel continued to provide first aid and basic treatment to the residents of the Hamlet of Phong Bac (1). This activity occurs approximately four times each week and attracts nearly half the village population of eighty.

9 August 1965 - Company "B" responded to a request for assistance from Company "B", 1st Battalion, 9th Marines which was under attack by small arms and automatic weapons. Tank fire was directed at the structure where the fire was coming from. A search of the area failed to reveal any enemy or weapons although spent cartridge cases from .30 caliber weapons were found. At 2330 the Battalion Command Post received a considerable amount of small arms and automatic weapons fire from positions directly in front of the southern portion of the perimeter. Within a very few seconds a heavy mortar barrage began landing throughout the Command Post area. Two living tents, the S-1 tent, and one defensive bunker received direct hits. The barrage lasted for approximately five minutes and approximately thirty rounds exploded within the perimeter and six in the Hamlet of Phong Bac (1). Muzzle flashes were seen coming from Yen Bac at (AT 984702) and Cam Ne (1) (AT 982694). The 60mm mortar rounds came from the first firing position and the 82mm mortar rounds were probably fired from the latter. An artillery fire mission was called on the suspected gun positions however due to the distance the results were not immediately known. The Battalion sustained twenty-three WIA, three of whom later died of wounds including the Battalion Adjutant. At 2338 emergency helicopter evacuation was requested.

10 August 1965 - At 0023 helicopters began arriving and all persons injured during the mortar attack were evacuated to the Third Marine Division hospital by 0050. Crater analysis revealed that the mortar rounds had come from the vicinity of the suspected gun position, however, a search by a patrol from the 2d Battalion, 9th Marines failed to discover any evidence of activity in those locations. The Battalion Command Post was reorganized and deeper and more heavily constructed bunkers were built. Company "B", operating with the 1st Battalion, 9th Marines captured six Viet Cong near (BT 054697) and turned them over to Hoa Vang District Headquarters for interrogation.

*Copy 121*

**UNCLASSIFIED**

11 August 1965 - Thirty-five Vietnamese were treated by Battalion Medical personnel and thirty pairs of shower shoes were distributed to the residents of Phong Bac (1). Company "B" captured clothing, ammunition, and other military items during a tank patrol south of Marble Mountain. At 2000 four rounds of sniper fire were received in the Battalion Command Post from positions near (AT 996712).

12 August 1965 - The Artillery Forward Observer assigned to the Tank Battalion observed numerous Vietnamese entering a small shrine 1000 meters forward of his position carrying long wooden boxes. A patrol was sent to the area in coordination with the Third Anti-Tank Battalion. No unusual activity was observed and the boxes could not be found.

13 August 1965 - Company "B" participated in a tank-infantry sweep in coordination with 1st Battalion, 9th Marines southwest of Marble Mountain. At (BT 069689) tank returned fire on a Viet Cong emplacement. One Viet Cong was wounded and was seen being dragged off by another. No further enemy activity occurred as the patrol continued its operations throughout the night.

14 August 1965 - Company "A" conducted tank-infantry patrol with elements of Company "C", 1st Battalion, 3d Marines in western portion of TAOR. No enemy contact. Company "B" conducted search and destroy operations near Marble Mountain without contact. Battalion headquarters command post defense weapons were fired for training and proficiency of crew members.

15 August 1965 - Two rounds of small arms sniper fire were received in the Battalion Command Post area. Location of weapons could not be determined. Company "A" continued its patrol with the 1st Battalion, 3d Marines. Sniper fire was received from a position near (AT 879689) however the area could not be searched due to dense underbrush.

16 August 1965 - At 2315 several voices shouting "You Die" were heard along the southern sector of the Battalion Command Post perimeter. This was followed by small arms and automatic weapons fire along all sides of the perimeter. Four 81mm mortar rounds fell along the eastern sector. Contact was broken when defensive automatic weapons returned a heavy volume of fire. The artillery forward observer called a fire mission at the suspected mortar position which resulted in six Viet Cong confirmed KIA. Reports indicated that approximately thirty Viet Cong were involved in the attack with approximately six automatic weapons being used. A late report from the Chief, Hieu Duc District indicated that twenty-six Viet Cong were killed by the artillery fire.

18 August 1965 - A twenty-six man patrol was conducted between 182200H and 190600H forward of the Battalion Command Post. No enemy activity noted. Company "C" reported that two of their tanks were extensively damaged during "Operation Starlight." The tanks had been involved in a very close and intense battle with the Viet Cong near Van Tuong. Tanks were damaged by anti-tank rockets, 81mm mortars, 57mm recoilless rifles, and well aimed small arms fire. Due to fluid nature of the situation the exact disposition of the tanks was unknown at this time. Company "C" reported one KIA and seven WIA. Company "B", 1st Tank Battalion reported one flame tank damaged and four WIA.

*Copy 1961 3*

**UNCLASSIFIED**

19 August 1965 - Company "C" sustained extensive damage on two tanks and moderate damage to three others during Operation "Starlight." One tank was damaged beyond repair and was destroyed by a demolition team. One other tank will require evacuation, remainder can be fully restored. Tanks destroyed numerous enemy fortifications, captured twenty-nine weapons and accounted for sixty-eight confirmed VC KIA.

20 August 1965 - A twenty-six man patrol was conducted from 200001H to 200600H in the area 2000 meters west of the Battalion Command Post. No enemy encountered.

21 August 1965 - A ten man ambush was established from 202200H to 210600H approximately 300 meters southeast of the Battalion Command Post. No enemy contact.

22 August 1965 - A twenty-six man combat patrol was conducted west and south of the Battalion Command Post. An ambush was established from 212130H until 220545 without enemy contact.

23 August 1965 - Company "B" guarded a downed friendly aircraft west of Marble Mountain. Upon removal of all required equipment the plane was destroyed by a flame tank.

25 August 1965 - The Vietnamese Regional Force Training Center (HOA CAM) immediately adjacent to the Tank Battalion's western perimeter was attacked by a Viet Cong force of unknown strength. No casualties occurred in the Battalion area. The training center sustained two KIA and thirty-seven WIA.

26 August 1965 - Three sniper rounds were received from positions directly south of the Battalion Command Post. Exact location could not be determined. No friendly casualties.

27 August 1965 - Company "B" while on search and destroy operation south of Marble Mountain received substantial small arms and automatic weapons fire. One Marine was WIA. Tank fire was returned on the sources of enemy fire, destroying the emplacement. Due to flooded area between tanks and target it was not possible to confirm enemy casualties.

28 August 1965 - Battalion Medical personnel continued to provide treatment to the residents of Phong Bac (1) immediately adjacent to the eastern sector of the Command Post area.

29 August 1965 - Company "B" conducted a patrol south of Marble Mountain with "A" Company, 1st Battalion, 9th Marines. Significant amounts of enemy small arms and automatic weapons fire were received by the tanks. Fire was returned resulting in three confirmed Viet Cong KIA. Addition casualties could not be confirmed since it was not possible to maneuver between the tanks and the main target area.

30 August 1965 - Three rounds of sniper fire were received in the southeast sector of the Battalion Command Post. Exact location of fire could not be determined. No friendly casualties.

*Copy 1g1*

DECLASSIFIED

UNCLASSIFIED

31 August 1965 - Company "A" Command Post displaced to (AT 946761). Company "B" conducted a reconnaissance patrol near Marble Mountain. Light enemy resistance was encountered and the tanks sustained one WIA. Tank fire was directed at the enemy positions, however, enemy casualties could not be confirmed due to the situation which required the tanks to continue to cover their patrol route.

RD OF TK CANNISTER AMMUNITION WAS FIRED. AN ARTILLERY FIRE MISSION WAS CALLED ON THE POSITIONS WHERE MORTARS WERE BELIEVED TO HAVE FIRED PR DURING THE 9 AUG ATTACK. SIX VC RAN OUT PR THE WOODLINE AT (AT 985704) JUST AS A 105MM WP RD FIRED BY E BTRY 2D BN 12TH MAR IMPACTED NEAR THAT POSITION. TWO OBSERVERS NOTED THAT ALL SIX VC WERE HIT AND DROPPED INTO THE RICE FIELD. NO FURTHER MOVEMENT ACCURRED THIS POSITION FOR THE REMAINDER OF THE NIGHT. THE VC BROKE CONTACT AT 162328H. A SEARCH OF THE SOUTHERN AND EASTERN FLANKS OF THE BATTALION AREA AT FIRST LIGHT 17 AUG REVEALED THREE POSITIONS WHERE THE VC WERE FIRING SA OR AUTOMATIC WEAPONS. HOWEVER, NO TRACES OF BLOOD WERE FOUND.

 3d Tank Battalion  
 3d Marine Division (Forward)  
 c/o FPC San Francisco, California 96601

PWJ/ces  
 5213  
 7 Aug 1965

**CONFIDENTIAL**

From: Commanding Officer  
 To: Commanding Officer, 3d Marines, 3d Marine Division  
 (Forward) (Attn: S-3)  
 Subj: Post-Operation; report of  
 Ref: (a) Sheets 6659III, 6658IV-Series L701-Maps Tourane  
 and Nong Son  
 Encl: (1) Overlay - Route of advance

1. Composition

1. Headquarters M48A3
- 1 Blade tank M48A3
- 5 M48A3's
- 3 M67 Flame tanks
- 2 LVTEL Mine Clearing

2. Mission. D day direct support (OPCON) 3d Reconnaissance Battalion in search and clear operation. D day plus 1,3 M67's, 1 M48A3 with blade, 2 LVTEL's attached to "B" Company 1/3 search and clear along western bank of Song Yen River. One platoon (reinf) direct support 1/3 during search and clear from high ground vicinity grid square 9364.

3. Trafficability

a. Generally the terrain was easily trafficable to tanks. There are areas where tanks are channelized. Limiting features encountered in order of proximence - mud, wet rice paddies, areas seeming to support tanks on surface which collapse due to subsurface weakness, and steep banks or ditches.

b. Fords - Three fords were encountered on the Song Tuy Loan River.

(1) 945204 - Depth 1 foot to 3 feet. Crossed at 0730, 2100, and 1800 with depth varying little at each respective crossing. The river is crossed at a 45° angle. Width is approximately 50 meters. A sand bar island is located in middle of river. Eastern bank gentle slope and sandy. Western bank steep slope and can be slippery.

**CONFIDENTIAL**  
*Encl #2*

**CONFIDENTIAL**

Approx. 12' high. Caution: Bottom is sandy and firm but current shifts the sand. Swimmers must be utilized before crossing. Tide may have some effect on depth of water too.

(2) 927707 Depth 6" to 1". Width 15 meters. Crossed at right angle. Both banks gently sloping and sandy. Bottom firm sand.

(3) 921707 Depth 6" to 2". Width 20 meters. Crossed at gentle angle. Both banks gently sloping and sandy. Bottom firm sand. Swimmers advised-current could cause deeper hole near eastern bank.

#### c. Bridges:

No bridges were encountered on the route to and from the objective. On the road running N-S between grid lines 94 and 95 there are several small culvert/bridges which can be bypassed in between grid lines 66 and 64.

#### d. Roads:

Roads on the western side of the Song Yen River were not utilized except for short stretches between grid lines 66 and 64 as noted above. The road is trafficable to tanks, but north of grid line 66, the road was not reconnoitered.

### 4. Anti-tank Mines, Weapons, Road Blocks, and Ditches

None of the above were encountered. No AP mines encountered.

### 5. Enemy Guerrilla Warfare Capability

The route taken by "A" Co. traversed country that would afford excellent cover and concealment for guerrillas. Mines capable of disabling tanks could be easily employed as well as concealed recoilless rifles and rocket launchers. Tanks are forced to travel the high ground where rocks and thick elephant grass and/or brush are abundant. The low ground consists mainly of prominent flooded rice paddies. Excellent fields of fire exist for tanks to shoot from the high ground to the low ground.

Hill 41 <sup>at</sup> the high ground in grid square 9364 affords a commanding view of the surrounding hills, mountains, and low ground. Direct fire can be employed in all directions from these areas.

### 6. Civilians

The local population seemed to be indifferent towards our presence. The elders were reticent at all times and the youngsters shy at first, but after the awesome pig iron monsters were in their area for some time, the kids were normally gregarious with an outstretched palm. I believe they would support both sides depending on who was present at the time.

**CONFIDENTIAL**

I think the V.C. have quite a strong influence in the area due to their seeming omnipresence. All males of military age were apprehended and evacuated for questioning by 1/3 during the 2 day operation. Regimental S-2 could give more accurate data on this subject of support. Their indifference leads me to conclude that they would like to be left alone to their menial tasks.

#### 7. Enemy

No enemy were encountered.

#### 8. Observations plus Opinions

a. Psychologically. Tanks can be used effectively in the Da Nang area. By their presence alone, they build confidence amongst the infantry, while at the same time, they shake the confidence of the enemy. It is not the quantity of tanks that is important. Psychologically one tank would suffice, but one could not support itself. An ideal composition for a tank/infantry search and clear operation would be comprised of 2 M67's, 2 searchlight M48A3's and dozer tank acting as the headquarters vehicle.

b. Size. The fewer the tanks, the better the support. In light of the paragraph above and considering tank trafficability, fewer tanks on an operation would mean quicker and more efficient support. The terrain encompassing the Da Nang area will support up to 5 tanks with greater ease than 6 or more. Mud is the greatest tank obstacle in this area. If tanks had to go through a muddy or wet soiled area, the chances are better that a small number would have more success than a large column of beetles. Usually the first 5 tanks can smoothly navigate these areas, and the following ones begin to bog down. This is costly in time and energy when speed and efficiency are essential. Consider also that usually the column must return by much the same route. The less a difficult area has been chewed up, the greater the chances are for a successful recrossing. Mobility is one of the pivotal points for tank support. Anything that could be done to increase our mobility should be attempted.

c. Searchlights. In a guerrilla war where most of the enemy contacts occur during the hours of darkness, early detection is essential and the ability to pick out targets is just as important. If more tanks equipped with searchlights were available, I believe tank support could be improved greatly.

#### d. Tank/Infantry Coordination

In the Republic of Vietnam half the battle on a tank/infantry coordinated sweep is fought before any enemy contact is made. This battle is the task the tanks face in reaching an objective. On every tank/infantry operation executed so far in Da Nang, almost without exception, the infantry has been

**CONFIDENTIAL**

delayed at length due to tanks encountering problems with the terrain. If the decision is made in the planning stages to employ tanks, a more realistic and accurate approach should be taken in reaching conclusions as to ETA and support at the objective.

For example, on this operation, a column of 5 tanks as outlined in the psychology paragraph above would have been ideal, and all commitments could have been fulfilled on schedule. About half of the route of advance had been previously negotiated by a platoon of tanks. The route was fairly well mapped out and reconnoitered by helicopter. An ETA of 3 hours and 30 minutes was given. The first four tanks arrived at the rendezvous point in 4 hours and 30 minutes. The last elements arrived after 6 hours and 30 minutes had passed from time of departure. The advanced guard (3 tanks) encountered no difficulties and was delayed for over one hour by vehicles bogging down in the rear of the column. A platoon of tanks could have reached the objective intact and on schedule. The delays cost us valuable time needed for further reconnaissance of the area utilized during the second day of operations.

The real heart of the matter lies in the fact that no matter how thorough a reconnaissance is made by helicopter or foot, one cannot give an accurate estimate of time where tanks are concerned until the tanks have physically traversed the area in question. With time will come the experience of having penetrated most avenues available to tracked vehicles. Then accurate estimates can be preferred. Until then, I believe we must utilize smaller numbers of tanks in the Western portion of the Da Nang sector, and the infantry should be accurately aware of the problems we encounter in our movement to contact. All tank/infantry operations should allow for the possibility of tanks not being able to rendezvous with infantry, or at least plans should be flexible to allow for unforeseen delays caused by terrain difficulties.

181400H Aug 65

Patrol Order 1-65

1. Situation

a. Enemy forces. Local force guerilla units up to Company size have been known to operate in the patrol area. No units are known to be operating north of the Song Cau Do river east of the bridge at (AT 946699) and west of the highway 1 bridge at (AT 998707).

b. Friendly forces.

(1) 9th Marine OP located at (AT 975705). Unit includes two tanks and local security forces.

(2) Company "E", 2d Bn., 9th Marines conducting clearing and holding operations in Cam Ne (1) and (2).

(3) 4th Platoon, Company "B", 1st Am Trac Bn. in blocking positions in the Song Cau Do River from the intersection with the Song Yen River west to the Highway 1 bridge.

(4) Elements from 1st Bn., 9th Marines occupy defensive positions at the Highway 1 bridge.

(5) 3d Tank Bn. and 3d Anti-Tank Bn. occupy defensive positions on the ridge line north of the Song Cau Do River (AT 986699) to (AT 990699).

2. Mission. To conduct a combat patrol south and west of the Tank Bn. defensive positions to prevent enemy infiltration into nearby friendly installations and to kill or capture the enemy.

3. Execution.

a. Concept of Operations. Under cover of darkness a combat patrol consisting of elements of the 3d Tank Bn, 3d Anti-Tank Bn., and 1st Am Trac Bn. will move from the IP [redacted] south and west along established trails to an ambush position at (AT 982702). The patrol will remain overnight in the ambush position returning to the IP at first light the following day. See Annex A.

b. Composition of the Patrol.

## Periodic Logistic Report No. 4

Period Covered - 291800 July 1965 to 051800 Aug 1965

Ref: (a) FO 4000.1

1. Logistic situation at end of period.

a. Company "C" (-)(Rein), 3d Tank Bn. (attached to the Third Marines) is experiencing a great deal of trouble maintaining tank mobility due to poor condition of tank track. There are 3033 Shoe, track assembly's for M6A3 Tank on requisition. If this track is not forth coming in the near future "C" Company will be forced to dead line tank operation in Chu Lai. Track, Road Wheels, Sprockets and Torsion Bars will bear close scrutiny in the environment tanks are now operating.

b. The 3d Plt, "C" Company, 3d Tank Bn in Phu Bai is in poor condition maintenance wise. Two Final Drives gave out this week. One was repairable. A maintenance contact team and spare parts are staged and prepared to go to Phu Bai to assist this Plt. However the transportation means of getting them there is a problem due to the weight of the spare parts.

c. Again spare parts seems to be the main problem area. Requisitions for these items are not being filled. At the rate tank units are consuming spare parts they will be inoperable in three months unless relief is not forth coming.

**DECLASSIFIED**

Hq. 3d Tank Bn (-)  
Da Nang RVN  
121800H Aug 1965

Periodic Logistic Report No. 5

Period covered: 051800H- 121800H Aug 1965

Ref: (a) FO 4000.1

1. Logistic Situation at end of Period

a. A lack of building materials has curtailed our efforts to build adequate ammunition and POL storage bunkers. Ammunition is dug in, however the tops are open and vulnerable to high angle fire weapons. Gasoline tankers are staged in "A" Company, 3d Tank Bn's area nightly until adequate protection for them can be provided. Proper storage of supplies in the field will not be adequate during the rainy season unless these materials are forthcoming.

b. The Table of Organization M4237 calls for 2 Officers and 43 enlisted men in the Tank Battalion Supply Platoon. At this time this organization has 2 officers and 21 enlisted. The T/O calls for 8 Sgts and above. This organization has 4 Sgts and above. Due to enemy action on 9 August, the Unit Supply Clerk 3041, who maintained this organization's fiscal records was lost. Most of the remaining personnel in the platoon are untrained. Due to the amount of supply work demanded by this battalion and because of the tactical requirements imposed on H&G Company of this battalion, the Supply Platoon is having an extremely difficult time performing its supply mission and at the same time maintaining its portion of the Company's defensive positions. Enough trained personnel to bring the supply platoon up to at least its manning level of 2 officers and 28 enlisted is required.

c. There seems to be a problem of procuring CO2 for fire extinguishers. Tanks must have CO2 extinguishers mounted at specified locations within the tank for safe operation. At this time some tanks are operating without a complete set of extinguishers. This organization has the capability of recharging the extinguishers however CO2 is not available in this area. On 8 August this organization requisitioned 5 bottles (250 lbs) on a priority 05 from FISG. This problem will be closely watched.

d. Due to the inability of FISG to support tank units with spare parts at this time in Chu Lai and Phu Bai, this battalion has been issuing spare parts to these units from its operating stock. Transportation of these items to the units has been a constant problem. A QySgt., 2149 has been appointed as the battalion contact man between the battalion and these two units. His main duties consist of performing liaison with the various transportation agencies to ensure transport of the parts. He has been fairly successful however it is essential that he be physically present at the embarkation point to ensure loading.

Enclosure 4-2

## DECLASSIFIED

c. During the early hours of darkness on 9 August the Bn CP and H&S Company was subjected to a heavy enemy mortar attack. Fortunately damage to supplies and equipment was not nearly as severe as it could have been. Rounds that impacted within the motor pool inflicted minor damage such as holes in radiators, fenders and puncturing of tires. All vehicles can be repaired pending availability of radiators. None of the operating stock was destroyed. The S-1/S-4 tent did receive a direct hit and consequently damage to the office equipment stated in paragraph 6, was severe.

 121800H - 191800H Aug 19~~6~~

## Periodic Logistic Report No. 6

Period Covered - 121800H - 191800H August 1965

Ref: (a) FO 4000.1

1. Logistic Situation at end of Period

a. An all out effort on the part of every member of this command has resulted in a 100% improvement in the defense posture of the command. However a lack of building materials has seriously curtailed our efforts to improve the badly needed ammunition and POL storage facilities, to build a Command Bunker, or to build adequate storage facilities for supplies and spare parts.

b. The report of 12 August 1965 mentioned the problems of the supply section's personnel requirement, the procurement of CO2 for fire extinguishers, and the transportation of spare parts to tank units in Vietnam. These problems still exist.

c. Indications are that the extent of equipment and vehicular damage and loss due to the action south of Chu Lai is heavy. First reports disclose that 5 M48A3 gun tanks and 2 M67A2 flame tanks were damaged. It is quite probable that 1 M48A3 and 1 M67A2 are damaged to the point that they must be surveyed. It is possible that some of the other tanks damaged will also be declared unserviceable. A LTI Team made up of members of this command and a 1st Echelon Tank Maintenance Man 2149 from FISG will go to Chu Lai and inspect the damaged tanks. Exact information on the extent of damage will be provided upon their return. Upon determination of damage this organization will take action to requisition replacement tanks if required. It is also our intent to request permission to replace unserviceable parts with serviceable parts on those tanks that are declared unserviceable.

ANNEX B to Periodic Logistic Report No. 6

1. Equipment Density Changes

- a. 1 M48A3 mount-out tank Ser No. 202158 issued to Company "B" 1st Tank Battalion for replacement of submerged vehicle Ser No. 192912.

**DECLASSIFIED**

S - 3

LOGSUM #7

101800H-241800H August 1965

1. Headquarters 3d Tank Battalion (-)
2. N/A
3. 988711
4. 10 July 1965
5. N/A
6. Supply Distribution

a. General Status

(1) The general availability and distribution of Class I, III and V classes of supply is excellent.

(2) The general status of Class II is considered fair except in regards to tank spare parts which is unsatisfactory. This problem is covered in paragraph 6.b.(1) below.

(3) Availability and distribution of Class IV supplies is unsatisfactory. This organization has requisitioned 144 rolls of barbed wire, 17,000 sand bags, 100 rolls of concertina wire and 168 stakes. None have been received. Further amplification to this problem is contained in paragraph 6.b.(2) below.

b. Significant Problem Areas

(1) Tank 2nd echelon spare parts are not being delivered. Tanks are operating with faulty, and sometimes unserviceable, equipment due to non-availability of spare parts. The reason is that FLSG does not have the Tank Battalions usage data of spare parts. 3d PSR does have this data. This organization has taken steps to assist 3d PSR in identifying tank peculiar spare parts for the purpose of expediting this information to FLSG.

(2) Through the process of borrowing sand bags, wire, and metal stakes from other units we have succeeded in building a good defense for the Battalion CP. These items will be repaid when they are received. There still remains a critical requirement for better ammunition, fuel and supply storage facilities. A requirement also exists for a dug in Battalion CP. These requirements are held up pending receipt of required Class IV items.

Encl 2 - 4"

DECLASSIFIED

7. Maintenance

a. General Status

(1) The maintenance capabilities of this Battalion is excellent pending availability of Tank and Vehicular spare parts. Maintenance Contact Teams travel to Chu Lai and Phu Bai with available parts to assist tank units in these areas.

b. Significant Problem Areas

(1) Spare parts as stated in paragraph 6.b.(1) above.

(2) Track and suspension systems of tanks are wearing out faster than anticipated due to sand, lava rock and heat. This problem is being watched very closely.

8. N/A

9. N/A

10. N/A

11. Medical

a. General Status. Very Good.

b. Evacuation Status.

## COMPANY B

1st Tank Battalion, FMF  
 3d Marine Division (Fwd), FMF  
 c/o FPO San Francisco, California 96601

AWL/jar  
 3Sep65

**From:** Commanding Officer  
**To:** Commanding Officer, 3d Tank Battalion, FMF  
**Subj:** After Operation Report, Operation Starlite  
**Ref:** (a) Map, VIETNAM, 1:50,000 AMS I701 Sheets 6757 II, 6757 III, and 6756 I

**1. Units.**

CeB(-), 1stTkBn, FMF  
 3dPlat, CeA, 3dTkBn, FMF  
 Sec. 2dPlat, CeO, 3dTkBn, FMF

a. CeB(-) consisted of one (1) Gun Tank, three (3) Flame Tanks, and a VTR, M51.

**2. Total Strength.**

3 Officers USMC  
 43 Enlisted USMC  
 1 Enlisted USM

**3. Date.** 18 August 1965.

**4. Time.** Approximately 0900-2400.

**5. Place.** Vicinity of Hamlet Complex An Cueng (1) and (2).

**6. Casualties.** USMC 1 KIA 13 WIA.

**7. Organization.** The Tank elements of RLT-7 were organized into three separate increments. The Section of 2d Platoon, Company C was attached to RLT 2/4. The 3d Platoon of Company A was attached to RLT 3/3. Company B (-) was with Headquarters, RLT-7 in a General Support Role.

**8. Scheme of Maneuver.** Companies of RLT 2/4 and RLT 3/3 advanced abreast on the left of the regimental zone (see overlay). The boundary between Companies was the streamline. Due to trafficability the tanks of both units advanced generally along the same axis.

**9. Terrain.** The area was primarily rolling, weeded or brush covered interspersed with dry crop fields, wet rice paddies, and paddy dikes. The dry crop fields were set apart by hedgerows of small trees and brush ranging from six (6) to ten (10) feet high.

Final #2

UNCLASSIFIED

10. Trafficability. With the exception of the wet rice paddies and the streamline areas, movement was fair to good. The dry crop fields were generally at different levels and movement through the hedgerows was slow until it was determined how much lower the next field was.

11. Observation. Direct line of sight rarely exceeded two (2) to three (3) hundred meters. Most often, either a tree line, a weeded knoll, or hedge-row restricted visibility to fifty (50) or one hundred (100) meters.

12. General. At approximate coordinates 700925 the advancing companies, with supporting tanks, came under enemy small arms, mortar, and anti-tank fire. Enemy positions were well concealed. The action continued between the first point of contact through the streamline and paddy area to approximate coordinates 702930. Near this point A34 was put out of action by Anti-Tank fire at close range. The Section of Company C Tanks assisted in evacuating the crew and returned to the defensive perimeter of ~~Hanapepe~~, Company 2/4 at approximate coordinates 703926. Two Tanks of 3d Platoon, Company A, having lost contact with supported infantry, also returned to the area of the perimeter. A35 had previously had track problems and returned to the beach in company with A33.

During this time RIF-7 Headquarters was moving into a CP at approximate coordinates 709927. Situation reports from the companies in contact had not been received and neither their position nor situation was known.

At approximately 1100, India Company 3/3 requested a Flame Section at their position. India Company was in contact with the enemy, but reported the route between them and RIF-7 CP was clear. The Flame Section moved out in company with five (5) LVT's with resupply for India Company. The Flame Tanks had not been assigned as escorts for the resupply column, but since going to the same destination, moved out together.

The column passed the area in which Company H 2/4, with supporting tanks, were engaged by a matter of meters. The column proceeded to approximate coordinates 700931 and was hit by small arms, mortars, and Anti-Tank weapons. B55 was put out of action and the wounded crew evacuated. The LVT's, attempting to get cover, drove into the rice paddies and bogged down. B55 having expended the .30 Cal. ammunition, with the .50 Cal. out of action, and the driver wounded by blown out fragments of the driver's periscope, broke contact and returned to RIF-7 CP.

A company of BIF 3/3 was mounted on LVT's and with B51 moved out to the point of contact.

At approximate coordinates 703928 the gun tank stepped to fire .30 Cal. at enemy running across the front. While firing, B51 was hit by Anti-Tank fire from the direct front. The Anti-Tank fire continued, from a well concealed position, at and over the tank into the LVT column that had closed up behind. When the column dispersed the gun tank again came under fire from the right flank before pulling back into a covered position. 90mm fire returned was limited to cannister since friendly positions were not known. When the Anti-Tank positions could not be determined by a foot reconnaissance contact was broken.

**UNCLASSIFIED**

A further attempt was made to relieve the column. At approximately 1600, Company L 3/7 with B51, A33, and the VTR moved north and then west to approximate coordinates 702932. Contact was made with the enemy. By the time the Company could advance it was too dark to determine the exact position of the column.

Radio contact was made between A33 and A32. It was reported that they had not had enemy contact for several hours. With the two elements separated by a rice paddy running five (5) to six (6) hundred meters long, contact was again broken at approximately 2340.

Early on the morning of 19 August 1965 the wounded were evacuated by helicopter. Two Companies of 3/7 with B51, A33, and the VTR moved into the area shortly thereafter. Evacuation of the dead and burial of enemy dead was accomplished. Recovery of vehicles was started. One LVT was recovered from the paddy and all tanks returned to KIA-7 CP. On 20 August 1965, recovery of the remaining vehicles was accomplished except for one LVT and A34. Both the LVT and tank had received multiple Anti-Tank and mortar hits. Both had burned in excess of thirty-six (36) hours.

Upon personal inspection by the Company B Commander it was determined that A34 was not of sufficient salvage value to risk attempting to evacuate or cannibalize it. Both fuel tanks, when ruptured, had burned. The engine compartment was completely gutted. The right track was burned off. The right air cleaners, storage boxes, and fenders were fused together from the heat. The left side had been hit, and though not burned, was of little value. In the turret the radio was melted in a mass. The deciding factor was the condition of the 90mm amm. The bases of the shell cases had swollen out over the deck hold downs of the ready racks. It was assumed that any amm stored under the turret deck, nearer to the heat source, would be in even more dangerous condition.

As requested, engineers blew the amm in place.

13. Remarks. The account as relates to the initial activities of both Company A and Company C was compiled from reports of participants. The account as relates to Company B results primarily from the participation of the Company B Commander.

#### LESSONS LEARNED

1. As a result of a very brief planning period and the attachment into three (3) tank elements there was a total lack of coordination except spontaneous assistance as the situation developed.

RECOMMENDATION: That in future operations of this nature Tank units be placed in direct support under central control and coordination of the Regimental Tank Officer.

2. That in the absence of knowledge of friendly troops' disposition the main gun of a tank cannot be fired without danger to friendly troops.

RECOMMENDATION: That subordinate unit situation reports be accurate and

**UNCLASSIFIED**

frequent enough to determine their disposition in so far as the situation permits.

3. That in the type of terrain in which this action took place it is not only possible, but probable, that the enemy can position a strong force in between two advancing elements.

RECOMMENDATION: That units requesting support from the rear provide necessary guides and/or security into their position as the situation and terrain dictates.

4. That when an infantry unit with attached tanks continues to advance through terrain impassable to tanks the tank unit loses contact and becomes an easy target for Anti-Tank weapons.

RECOMMENDATION: That if a tank unit cannot continue the advance the supported unit must give specific instructions as to a rally point, another unit location or leave them adequate security to provide close in Anti-Tank defense.

5. That in an area where concealment favors the defender tanks are particularly vulnerable to close in Anti-Tank fire.

RECOMMENDATION: That in terrain encountered in this operation infantry precede tank elements until the absence of Anti-Tank positions is assured.

A. W. LAMB
